

SOFT RACKS

SKB soft cases have been developed with the focus on portability and include an adjustable shoulder strap and loop handle for easy transport.

The 14.5" depth (front rail to back flap) provides plenty of room for the most popular wireless systems. The padded front and back lid has heavy duty zippers that allow for the flaps to open fully and fold underneath. A zippered pouch on the inside front flap provides excellent storage of wireless mic antennæ. An ample sized exterior zippered pouch is ideal for cables and/or body packs. Threaded steel rack rails are recessed to provide protection for equipment controls without inhibiting proper antennæ placement. These cases are covered by SKB's one year Soft Product warranty.

Exterior zippered pouch for accessories

Adjustable shoulder strap for easy carrying

Heavy duty zippers

SPECIAL FEATURES
